

ESLINT AND PRETTIER

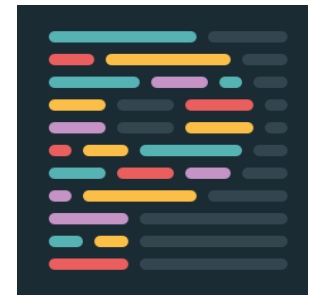

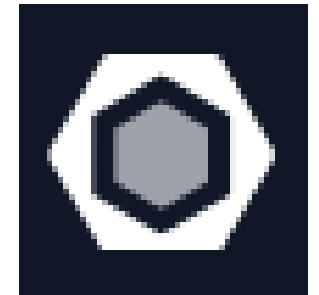

Alex Hanus

AGENDA

- History
- What are ESLint and Prettier?
- Quick demo
- Potential uses in capstone projects
- Summary

HISTORY

- ESLint
 - Created by Nicholas Zakas in 2013
 - Worked at Box and encountered “the bug”
 - Unhappy with Box’s “linter” and unable to find a good alternative
 - Developed ESLint after discovering “PHP linter” at Box
- Prettier
 - Created by James Long in 2017
 - Worked at Mozilla and actually tried ESLint
 - 100s of semantic and formatting rules
 - Wanted something more deterministic, less debating about style

SO, WHAT ARE THEY?

- ESLint
 - Statically analyzes code to find problems
 - Often can automatically fix problems as well
 - Customizable rules
- Prettier
 - Code formatter
 - Simplify/eliminate discussion of coding styles
 - Intentionally has few options

DEMO

POTENTIAL IN CAPSTONE PROJECTS

- Prettier
 - Maybe your team just needs to stop talking about code styling
 - Speed up code reviews/pull requests
- ESLint
 - Maybe your team wants something that checks for errors
 - Increase code quality across the board
- Both make onboarding wildly easier

SUMMARY

- Prettier
 - A style checker to get your team to stop debating on code style
 - Lightweight, quickly configurable
- ESLint
 - A static code analyzer that can be configured to fix many issues
 - Scalable, many ways to configure
